

Regarding LPFM - I am a listener of KLOVE Radio. I also support the station financially. The encouraging, positive music on this station has changed my life in big and small ways every day. I know this is true for many others around the country and even world as well. If this programming was not on the air, I and many others would spend many days in despair and without hope of a better life in this world. KLOVE's service is in the public interest because it gives us a positive outlook that we spread to those we interact with each and every day...other drivers, retail and co-workers, family, friends, neighbors. This station literally promotes and builds good will toward all and therefore makes the world a better place.
